

# PeopleSoft to Cloud Readiness Assessment

Are you at a  
crossroads with  
your PeopleSoft  
Applications?

You are not alone. Organizations running PeopleSoft grapple every day with how to support these business-critical applications.

## How can we help?

Our PeopleSoft to Cloud Readiness Assessment is a three-step collaborative process. Together, your business experts and our experienced team will evaluate your options and identify a path forward.

## What is your role?

This tailored assessment requires your help. While the time commitment varies based on the area, your business experts should dedicate 10 – 20 hours to reviewing their processes with our team so we can help you plan the best path forward.

## Why Sierra-Cedar?

With 100+ Managed Services Customers, 85+ Oracle Cloud Applications projects, and 25+ years working with Oracle Applications, we have the experience to map out your unique path to cloud.

STEP ONE

### Plan

Modernizing a system can take several years. This transition can be executed in smaller, incremental steps. Reviewing your options in detail will help you outline your goals and short and long-term objectives.

STEP TWO

### Discover

Conducting high-level discovery sessions allows us to assess your current processes and applications. These sessions can focus on one key area, multiple areas, or your entire business process.

STEP THREE

### Results

The results of the assessment will provide a high-level plan with short-term quick wins and a long-term sustainable strategy.
