

PeopleSoft Consulting Services

CedarCrestone's Consulting services offer clients an empowering, streamlined way to maximize their PeopleSoft Enterprise investment. As the largest Oracle PeopleSoft Enterprise-focused consulting firm in the US, CedarCrestone offers clients an unparalleled depth of knowledge and broadly skilled resources. Whether a client is embarking on a new PeopleSoft initiative or looking to upgrade or extend their current application(s), the following services provided by CedarCrestone will ensure a successful project:

- **Project Preview** – Comprehensively assesses the upcoming project and develops a solid plan for successfully executing the remaining project phases. CedarCrestone structures the sessions using a business process-driven approach. The focus of these sessions is to rapidly gather, organize, and evaluate business and system requirements at a high level to accurately assess the remaining phases. Project Preview serves as a project planning tool and brings clarity quickly to a project.
- **Implementation** – Provides a total Implementation solution for our clients with a proven approach that is efficient, accurate, and cost effective. Our experience in performing PeopleSoft Enterprise implementations has helped us to develop the most effective tools and approaches for the delivery of all of our clients' potential implementation service needs. Both onsite or through our implementation lab, CedarCrestone's services are both reliable and innovative to ensure your PeopleSoft environment is delivered on time and on budget.
- **Upgrade Services** – Using CedarCrestone's Propel Methodology, developed specifically for delivering PeopleSoft Enterprise Services, our team of upgrade specialists delivers a proven and refined approach to the upgrade process. CedarCrestone has developed a complete solution to maximize a PeopleSoft Enterprise upgrade, including customizations, data conversion, reporting, security, testing, training, and post-production support. Additionally, CedarCrestone offers strategic alternatives for managing your environment once your organization is in production.
- **Extending the Enterprise** – CedarCrestone implements add-on products to extend the enterprise (such as self service and Portal applications) in a structured four-stage approach to allow for flexibility and to completely ensure project success.

Client success is CedarCrestone's business. As your partner, CedarCrestone can help leverage your technology investment with results-oriented service offerings. Our services will see you from project preview to post production of your PeopleSoft Enterprise applications.
